The figure consists of two pie charts. The main chart, titled 'Anteil in % von 436 GW', shows the share of different energy sources in Germany's total energy generation in 2013. The data is as follows:

Energy Source	Share (%)
Erdgas	21,5
Kohle	24,9
Erdöl	33
Kernenergie	7,9
erneuerbare	11,5
sonstige	1,2

The smaller chart, titled 'Anteil in % von erneuerbare', shows the share of different renewable energy sources within the 11,5% share of renewable energy. The data is as follows:

Renewable Energy Source	Share (%)
Biomasse	6,9
Wind	1,3
Photovoltaik	0,7
Wasser	0,6
Solarthermie	0,2
sonstige	0,9
